# ISO 22000:2018 FSSC 22000 V6.0 INTRODUCTION

## Course Introduction

This course serves as an introductory session on the ISO 22000:2018 Food Safety Management System standard.

Participants will learn about the key principles and requirements of ISO 22000:2018, including the Plan-Do-Check-Act (PDCA) cycle, risk-based thinking, and the importance of top management commitment. The course will also cover the integration of prerequisite programs (PRPs), hazard analysis and critical control points (HACCP), and operational prerequisites (OPRPs) into a cohesive food safety management strategy.

By the end of the training, attendees will have a clear understanding of the roles and responsibilities necessary to maintain food safety, the significance of internal and external communication, and the need for continuous improvement. This foundation will enable participants to contribute effectively to their organization's food safety efforts and prepare them for more advanced training courses or certification processes in the future.

Overall, this introductory session aims to build confidence and competence among participants, empowering them to champion food safety initiatives within their organizations and ensuring that the highest standards of food safety are upheld.

## Topics Covered

- What is FSSC
- FSSC 22000 Benefits
- FSSC Scheme Structure
- Technical Specification for PRP
- What is ISO 22000:2018
